LET HAPP CONTROLS DO THE UPGRADE FOR YOU!
MEI-NEXGEN-PROG \$25.00

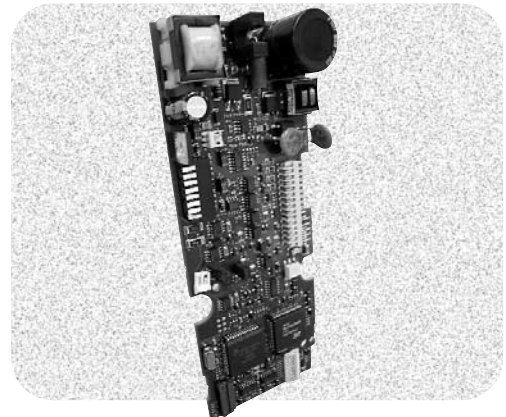

CONTROL BOARD UPGRADE WITH EXPANDED CAPABILITIES FOR MEI AE2600 BILL VALIDATORS

This new control board upgrade adds new features to existing AE2600

- Software programmed to take NexGen \$20
- Ability to accept MEI custom coupons used for refunds, promotions, etc.
- Additional memory to accept future upgrades, - \$5 & \$10 is under redesign evaluation (the memory on current AE2600 is near capacity)
- Hard reset capability
- Available for either 115v or 24v MEI AE2600 validators

Part Number		Price per ea.
42-0740-00	Control Board Upgrade – 24v	75.00
42-0741-00	Control Board Upgrade – 115v	75.00

MEI TRADE-UP PROGRAM

In the Fall of 2003, the Bureau of Engraving and Printing will introduce the new NexGen \$20 Bill. The redesigned currency is safer, smarter and more secure: **Safer** because it is harder to fake and easier to check; **Smarter** to stay ahead of tech-savvy counterfeiters; and **More Secure** to protect the integrity of U.S. currency.

The most noticeable difference in the new design is the subtle introduction of background color, which makes it more burdensome for potential counterfeiters because it adds complexity to the note. The color will also make it easier to distinguish between denominations, because different background colors will be used for each denomination.

MEI Series 2000 bill validators are flash memory programmable so the bill sets can easily be changed as new currency becomes available.

MEI and Happ Controls are pleased to offer a trade-up credit towards the purchase of an AE 2600 Series or an AE2800 series bill validator. To qualify for the trade-up credit, simply contact your Happ Controls Sales representative to arrange for the return of your AL4/VFM4, GL5/VFM5 or LE3800.

- **Effective Date: Now through December 31, 2003**
- Qualifying units: MEI AL4/VFM4, GL5/VFM5 and LE3800
- Any Competitive Product that accepts a \$20 bill is also eligible to receive a Trade-up credit
- Trade-in Value: **\$50.00** toward the purchase of an AE2600
\$65.00 toward the purchase of AE2800
- Units do not have to be in working condition for credit
- You can bank on Happ Controls to keep you up to date on all the latest currency changes

\$\$\$ NexGen CURRENCY IS COMING \$\$\$

The New Color of Money: Safer, Smarter, More Secure.

- U.S. Treasury and Federal Reserve Plans for Redesigned \$20 Notes to be released in Fall of 2003
- In an effort to stay ahead of counterfeiting, the U.S. Department of the Treasury's Bureau of Engraving and Printing and the Federal Reserve System are introducing newly redesigned currency in late 2003. The newly redesigned bills will be safer, smarter and more secure and will include enhanced security features and other new designs that will help deter counterfeiting and protect your hard-earned money. For the first time in recent history, the newly redesigned currency will also include a subtle introduction of color, which will make it more burdensome to counterfeit and make it easier to distinguish denominations.
- Circulation of the new series will begin in late 2003 with the issuance of the redesigned \$20 note. New designs for the \$50 and \$100 notes will follow in 2004 and 2005. The redesign of the \$10 and \$5 notes is still under consideration, but a redesign of the \$2 and \$1 notes is not planned.
- You can bank on Happ Controls to keep you up to date on all the latest currency changes. Happ Controls will be able to supply you with all the latest software and EPROM upgrades.
