

ChipWasher™

When the action's hot on your casino floor, you don't want anything slowing it down. And that's exactly what dirty chips do – the build-up of oils and residue makes them sticky and difficult for your dealers to handle, which makes for slower play. Surveillance and identification becomes increasingly difficult. And your customers' gaming experience is considerably lessened. Regular chip washing prevents all of this, but hand-washing is time-consuming and costly. This is exactly why we created the ChipWasher – the practical and efficient means toward cleaner casino chips.

Benefits:

- Faster chip handling
- Ease of operation right inside the cage
- Cleans 4000 chips per hour
- Simple user interface, with LCD screen and keypad controls
- High-speed labor saving device
- Specialized unique cleaning solution is environmentally friendly
- Elevates your casino's image
- Enables greater surveillance identification
- Hygienic
- Ergonomically designed

Part No. 17-01-10001-000

Specifications:

Dimensions

Depth 682mm (2.2 feet)
Width 762mm (2.5 feet)
Height 1556mm (5.1 feet)
Weight 120Kg (265lb)
Power Requirements:
240v (10A) 50-60Hz

Dolphin Gaming Chips

These state of the art chips are manufactured using a Dolphin proprietary material that was developed by Dolphin R&D in collaboration with raw material suppliers. They are manufactured using over molding technologies.

Used by casinos throughout the world for over ten years, Dolphin's chips are used by most of the major casinos in Australia such as Crown Casino, Melbourne and Star City, Sydney as well as the Galaxy Groups' Starworld Casino located in Macao, China.

Dolphin offers a wide range of American style gaming chips with 30 different color combinations of 2 or 3 color chips. The chips can be 39 mm or 43 mm in size with a decal center. Personalized multiple color combinations are available.

Pad printed poker chips are one color injection molded chips with required logo, design and/or casino name pad printed on both sides. These chips are economical and can be delivered quickly.

Features:

- Long life - extremely hard wearing material
- Fade resistance
- Surface Integrity
- Precision injection molding for intricately inlay with no surface grinding needed
- "Clay feel" that is scratch-proof and practically impossible to mark
- Soft on the hands for comfortable play
- High-level, state-of-the-art security with exclusive chip nanotechnology
- Anti-static
- 5-year warranty

RandomPlus Shuffler™

With its continuous mode option by Elixir Gaming Technologies this is one the most versatile shufflers manufactured today. It can be used for table games utilizing one to eight decks of playing cards. From single-deck Blackjack to eight-deck Baccarat, the RandomPlus® Shuffler provides a "batch system" shuffle with two separate groups of cards. The batch mode operations neutralize card counting by decreasing penetration, which normally reduces the amount of hands dealt.

However, with the superior speed of the RandomPlus® Shuffler productivity remains high because a second group of cards is ready for play. Elixir Gaming's patented technology produces an independent card selection, where cards can be ejected from the card tray and restacked in an unpredictable manner. This technology negates advantages achieved by expert players; eliminating memorized sequences, clumps or slugs. While most shuffling machines repeat the same mechanical action, each shuffle in the RandomPlus® Shuffler is unique.

Features

- Utilizes random selection process, ensuring unpredictable and untrackable shuffle
- Continuous, shuffle mode option
- Card count verification with built in diagnostics
- Accommodates paper, plastic, plastic coated cards
- Batch Shuffles 1-8 decks
- Features universal electrical power
- Service Contracts and Service Plans available

Benefits

- Enhanced security and integrity
- Superior shuffle speed
- Increase productivity

Part No. 13-01-20090-0045

Deck Checker™

This automated playing card scanning machine is an integrated management system and an on-board vault security system. It identifies cards by suit and value, ensures accurate card count, and confirms that all cards are present. The Deck Checker™ validates the integrity of each card, identifies missing or extra cards and rejects all non-conforming cards. Additionally, a complete audit trail for every transaction is printed providing enhanced security and integrity.

Features

- Systematically scans 1 to 8 decks
- Each deck scans in less than 15 seconds
- Programmed for all standard playing cards
- Printed audit ticket with signature lines
- Optional barcode seal number
- Features universal electrical power
- Standard games or customized program scanning options
- Can be programmed to read up to six face designs
- Accessories available
- Service Contracts and Service Plans available

Benefits

- Enhanced security and integrity
- Increased productivity and decreased labor costs by minimizing manual deck checking time
- Front House-ensures that table games open with complete accurate decks, reducing the amount of time to open a game
- Back House-reduces back of house labor costs by expediting verification process of pre-shuffled and used cards

Part No. 12-01-10416-3005
