

Technical Specifications

Acceptance Rate
98% or greater²

Bill/Barcode Coupon Insertion
Bills – up to 50 notes, four ways,
face up & down
Barcode Coupons – two way face up

Transaction Speed
Approximately 3 seconds to stack

Escrow
One bill or one barcode coupon

Interfaces
Multiple serial protocols

SC Series Cash-box Capacity
Greater than 500 notes

Power Source & Consumption
12V – 28VDC
Standby: 10 Watts
Accepting: 30 Watts
Stacking: 70 Watts

Shipping Weight
SC Series 4kg (9 lbs.)
SC Cash-box 1.5kg (3 lbs.)

Environmental
Operating Temperature 0°C – 60°C
Storage Temperature -30°C – 70°C
Humidity 5% – 95%³

MEI CASHFLOW SC Series Models

- SC66XX X – " " Flash unit
| "P" Prom unit
- 00 OEM Configurable (no harness)
 - 02 OEM Proprietary
 - 04 Opto Isolated EBDS
 - 07 RS232 EBDS

MEI CASHFLOW SC Series Accessories

How? By Streamlining Your Payment Systems.

Equipped with advanced digital processing technology, algorithms and engineering, MEI CASHFLOW™ SC SERIES sets the new standard of performance and value for bill acceptors.

MEI CASHFLOW™ SC SERIES increases your unattended transaction cash flow with:

- Ultimate acceptance rates.
- Superior security.
- Fast, efficient bill handling.
- Well-designed, affordable package.

Advanced Acceptance & Security

MEI CASHFLOW™ SC SERIES design incorporates a unique recognition and processing system. The unit has higher overall acceptance rate for ALL bills, plus bar code recognition, eliminating consumer frustration. Features include:

- Proven Swiss recognition technology with a revolutionary illuminating "light bar" source providing six wavelengths of light.
- Lensed receivers that scan 300% more bill surface.
- 100 Mhz Digital Signal Processor (DSP), using advanced recognition algorithms.
- Increased security and bills-per-minute acceptance.
- Highest ticket acceptance rates through DSP processing of a custom bar-code sensor output.

Exceptional Bill Handling

MEI CASHFLOW™ SC SERIES virtually eliminates early rejects by attempting to accept all bills. Differences from other bill acceptors are:

- New bill transport system enables currency transaction in all conditions and decreases the risk of jams.
- Smooth, short and tall bill path is sealed against fluid and dust.
- Continuous gear-drive system has 16 rollers between the acceptor and cash-box and transports and stacks bills into a locked, removable cash-box.
- Combines the bill handling and the advanced bill recognition system to increase acceptance rates and reduce jams.

Lower Cost of Ownership

MEI engineers leveraged their experience to design features and functionality to withstand tough conditions and still perform. You save money with a durable, secure bill acceptor that lasts longer, has increased uptime and requires fewer technician visits.

- Cash-box constructed of a durable, high impact plastic, with a welded design.
- Curved exterior design protects internal mechanisms, drive gears and secures cash.
- Common acceptor module, regardless of the machine manufacturer.
- Inexpensive interface cards slide mounted in the unit chassis provide custom electronic interfaces for current machines, while maintaining flexibility for the future.
- Soft failures are reduced by allowing cleaning at intervals four times longer than competitive products.

Superior Ease of Use

MEI CASHFLOW™ SC SERIES is easy to use:

- Acceptor detaches, opens and cleans easily.
- Traffic light LEDs provide front-line at machine diagnostics.

Superior Ease of Use continued

- USB port on the front, allows convenient interface for support tools.
- Features a one-hand, ergonomic cash-box.
- No latches or levers on the cash-box.

The cash-box also features the first dispute resolution window to show the value area of the last bill stacked in the cash-box, requiring no removal or opening. By viewing the actual bill last fed, customers have solid proof and dispute resolution is expedited. And, equipment downtime is reduced.

Operator Benefits at a Glance: The MEI CASHFLOW™ SC66 provides you:

Benefit:	Features:
Increased revenue from exceptional barcode and secure bill acceptance.	1 2 3 4
Increased revenue from processing worn and damaged currency.	5 6 7 8 9 10
Reduced Cost of Ownership from:	Above Plus
• Durable, Secure Cash-box	11 12 13
• Exceptional Jam Performance	5 6 7 8 9 10
• Minimal Preventative Maintenance	6 1 2 3
• Minimum Spares Holding	14 15
Easy to Use because:	
• Easy to remove/open/clean acceptor	16 17 6
• Positively resolve bill disputes	18
• Mount/power bill entry guides w/o tools	19
• Configure unit on the floor	20
• Diagnose problems on the floor	21
• Quick to update software	22
• One hand, ergonomic cash-box operation	23 24 11

Quality, Reliability and Performance...

When MEI developed the first electronic bill validator 30 years ago, it influenced payment systems in many major industries: Gaming, Vending, Parking, Transportation and Retail. Today, MEI electronic payment systems are relied upon for more than 1 billion transactions a week in 90 countries. MEI is considered the most reliable choice in hundreds of real-world applications and has earned the best performance reputation in the market.

The new MEI CASHFLOW™ SC SERIES embodies MEI innovations and insight from building more than 3 million bill acceptors. The result - dramatically improved customer satisfaction, measurably increased cash flow and significantly reduced operating costs.
