

# Field Bulletin

- Obsolete Atmel PROM Device
- SC66XX

<b>Bulletin #:</b>	<b>FG00105</b>
<b>Bulletin Date:</b>	<b>January 25, 2005</b>
<b>Subject:</b>	<b>Obsolete Atmel PROM Device</b>
<b>Affected Model(s):</b>	<b>SC66XX</b>
<b>Updated Config. Code #:</b>	<b>N/A</b>

## Summary:

The current SC Series PROM that is specified by MEI is now an obsolete part and will no longer be manufactured by Atmel. Atmel has specified a replacement PROM that is compatible with the SC Series.

## Detail:

The new replacement PROM has the same memory capacity and pin-out as the obsolete PROM. Virtually all the PROM characteristics are the same with the exception of the “Fast Read Access Time” which will be 30 ns slower with the replacement PROM. MEI Engineering tested the replacement PROM and found this not to be an issue. Further details of the operating characteristics for both PROMS’s can be found on Atmel’s website ([www.atmel.com](http://www.atmel.com)).

New PROM OEM prt. #  
AT27LV040A-12JI

## Action:

MEI recommends that the existing stock of the AT27LV040A-12JC be used up prior to using the AT27LV040A-12JI PROM. This bulletin only applies to jurisdictions that require the use of a PROM memory device. Any questions can be directed to MEI at the number below or AESI @ (702) 597-4840.

Questions should be directed to MEI Technical Support at 1-800-345-8172 or our web site: [www.meiglobal.com](http://www.meiglobal.com)
