

- D – wheel replacement
- SC66XX X

<b>Bulletin #:</b>	<b>FG01006</b>
<b>Bulletin Date:</b>	<b>August 1, 2006</b>
<b>Subject:</b>	<b>D-wheel replacement</b>
<b>Affected Model(s)</b>	<b>SC66XX X</b>

### Purpose:

This bulletin describes the recent changes to the SC66XX X product design.

### Details:

The “D” wheel design used in the SC/SCL series of bill acceptors has been replaced with a simpler wheel design in the 66mm platform. The design intent of the “D” wheel was to help center notes in a multi-width platform (SC83 and SC85). As the 66mm platform is a fixed-width platform, it has been verified that the centering function of the “D” wheel in the 66mm platform is not required. Ultimately, the new wheel design has been introduced to simplify our manufacturing process for the 66mm product while maintaining product performance. All 66mm units manufactured June 20<sup>th</sup> and after will have the new wheel design. Figures 1 and 2 show the new design versus the old.
