## **Revision History**

Commentary           BB-BB1180         01/05/17         BB300         Barbados         CCNET           1. Acceptance rate of 2 BBD ('13), 5 BBD ('13), 10 BBD ('13) and 20 BBD ('13) has been improved.         2. Maintenance mode (cleaning card) support added.           3. Introduced Jam Recovery feature (in Unloading and Dispensing).         4. MODULE IDENTFICATION command has been enabled in IDLING state.           5. "EMPTY DISPENSER" command has been enabled in OxCA failure state.         6. Greeting message was changed to "SUZOHAPP".           BB-BB1170         12/17/13         BB300         Barbados         CCNET           1. Processing of new 2, 5, 10 and 20 BBD issued in 2013 has been introduced.         2. All the latest software improvements in preparation for the divestiture of Bill-to-Bill product line have been incorporated.           BB-BB1150         03/10/06         BB300         Barbados         CCNET           First release.         Distinctive features are:         1. Metal bezel support.         2. Barcode recognition.         3. Jam (credit loss) prevention.         4. Chasis soft download via CCNET.         5. Improved short bill returning.         6. Pass sensor's processing during bill packing has been improved to prevent rejection of single bills.         7. 'SET OPTIONS' and 'GET OPTIONS' commands have been added to CCNET.         8. Processing of the following options has been implemented:         'LED BV INHIBIT' > 0 - LED is red in BV_INHIBIT state; 1 - LED is trured off         'KEEP BILL' > 0 - bill will be dropped af	ltem No.		Release Date	Device	Country	Comm. Protocol	
Acceptance rate of 2 BBD ('13), 5 BBD ('13), 10 BBD ('13) and 20 BBD ('13) has been improved.     Maintenance mode (cleaning card) support added.     Introduced Jam Recovery feature (in Unloading and Dispensing).     MODULE IDENTIFICATION command has been enabled in IDLING state.     "EMPTY DISPENSER" command has been enabled in 0xCA failure state.     Greeting message was changed to "SUZOHAPP".     BB-BB1170     12/17/13 BB300 Barbados CCNET     Processing of new 2, 5, 10 and 20 BBD issued in 2013 has been introduced.     All the latest software improvements in preparation for the divestiture of Bill-to-Bill product line have been incorporated.     BB-BB1150     03/10/06 BB300 Barbados CCNET     I. Metal bezel support.     Barcode recognition.     Jam (credit loss) prevention.     A Chassis soft download via CCNET.     Improved short bill returning.     Frest release.     Distinctive features are:     I. Metal bezel support.     Set OPTIONS' and 'GET OPTIONS' commands have been added to CCNET.     Set DPTIONS' and 'GET OPTIONS' commands have been added to CCNET.     Processing of the following options has been implemented:         'LED BV INHIBIT' -> 0 - LED is red in BV_INHIBIT state; 1 - LED is turned off         'KEEP BILL' -> 0 - LED is red in BV_INHIBIT state; 1 - ON)     TURN SWITCH' -> witch turning after bill packing (0 - OFF, 1 - ON)     TURN SWITCH' -> witch turning after bill packing (0 - OFF, 1 - ON)     TURN SWITCH' -> witch turning after bill packing thes been added.     Control of triangle wheel in metal bezel during bill accepting has been improved to prevent the bill sticking;     Control of triangle wheel in metal bezel during bill accepting has been improved to prevent the bill sticking;     Control of the algorithm of BB self-testing; if cassette(s) is (are) removed, software has to skip the algorithm
