Hinged Bezel Kit for the Galaxy II (Kit # 42402)
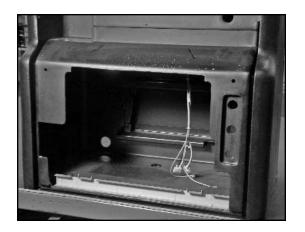

This kit replaces an old style bezel with the newer hinged bezel.

Note: This kit may only be used to update Galaxy II's above serial number 1992. The formed edge on the bezel needs a groove on the Upper Cabinet to fit properly. The groove only appeared on later versions of the Galaxy II.

Parts List

42168
Bezel
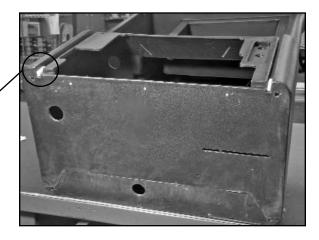

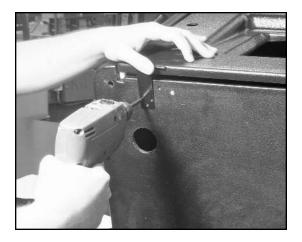

42553
2 Spacer

42157
Cabinet
Hinge

41872
Screw

41872
Screw

1. Unplug the Galaxy II from the wall.
2. Unplug the wire harness, monitor cable, network lines and phone line from the main board.
3. Remove the target door of the Galaxy II.
4. Remove the old bezel.
5. Remove the monitor.
6. Remove the four nuts and bolts securing the upper cabinet to the lower cabinet.

7. On a flat surface, lay the upper cabinet on its back.

8. Place a plastic spacer in the groove on each side. These are used to set the depth of the bezel.

9. Lay the new bezel in place on the upper cabinet.
10. Slide the cabinet hinge onto the bezel hinge, making sure both sets are properly seated.
11. Drill three 3/32" (.094") holes into the bottom of the upper cabinet using the cabinet side hinge leaves as templates.

12. Using the screws provided, attach the cabinet side hinge leaves to the upper cabinet.

13. Remove the plastic spacers.
14. Reassemble the Galaxy II.
