

November 5, 2003

The MEI Bill Programming Module (BPM) contains software for the NexGen \$20 bill based upon the initial bill samples provided by the Bureau of Engraving and Printing (BEP).

Due to slight variations within a limited number of bills printed by the BEP the acceptance of NexGen \$20 bills may be decreased.

MEI is actively working on revising the NexGen \$20 software to compensate for these now identified variations of the bills.

If you observe a reduced acceptance ratio of NexGen \$20 bills within the MEI AE2600/AE2800 or LE3800/LE3900 simply contact your MEI Authorized Distributor and the new software, once completed, will be provided under your warranty.

New software is estimated to be completed mid-November 2003.
