

REVERSING the MIRRORED IMAGE on the EYGO 19" VGA Monitor, Happ 49-5350-00

- 1.) Follow the wires from the yoke to the grey chassis board connector.
- 2.) Unplug the grey connector from the chassis board.
- 3.) With a wire cutter, cut the plastic plug itself between the yellow and blue wires.
- 4.) Rotate the Red/Blue wire side of the connector so that the red wire is next to the yellow.
- 5.) The wire colors should now be (from left to right as viewed from the rear of the monitor)
Green, Yellow, Red, Blue.
- 6.) Power up the monitor for test.
- 7.) End of procedure.
