

# Currency Counter/Verifier

SCAN COIN VC100D Mini (VS)

1.2.3

SUZOHAPP's SCAN COIN Vacuum Counter, VC100D Mini (VS), is ideal for rapid and accurate counting of both new and used banknotes of poor quality, and also for counting bundles. It has a -unique versatility feature whereby it can be adopted for counting any transactional document like currency and food stamps in banks, stores, post offices etc.

- ▶ Fast and with a compact design
- ▶ Five speeds to choose between
- ▶ Five modes of operation
- ▶ User friendly and easy to use

# Straight forward efficiency, wherever you want

SUZOHAPP's SCAN COIN VC100D Mini (VS) is the smallest vacuum machine in the VC100 series. It is portable easy to move. This flexible and compact desktop counter is easy to use and can be placed in any small place. VC100D Mini (VS) features five variable speeds to choose between.

## Loaded with customer benefits

The SC VC100D Mini (VS) is easy to use with one adjustable 270 degree rotary display, and one display on the control panel. Both with large easy-to-read green LED digitals, for visual confirmation.

There is a convenient Note plate to put the banknotes on before and after counting. And to avoid problems with folded banknotes the SC VC100D Mini (VS) is equipped with a combing spring for arranging the banknotes before counting.

The dust-guide lid on SC VC100D Mini (VS) prevents dust from spreading out. It closes itself when machine starts operating. SC VC100D Mini (VS) also features an Ultraviolet Germicidal Lamp to purify the air near the machine.

## Five Modes of Operation

SC VC100D Mini (VS) has five counting modes:

**Add Mode:** Several counts can be totaled and displayed by pressing the function key.

**Count Mode:** Provides rapid and continuous count of unknown bundle quantities in the holder while the running total is display.

**Check Mode:** Verifies a known quantity in a bundle. If the quantity does not match the programmed quantity, from 1 to 200, the holder automatically locks and a sound alerts the operator of a discrepancy.

**Batch Mode:** The preset batch numbers can be easily selected from 1 to 200 on the keyboard. The counting automatically stops when the batch quantity is reached.

**Alarm Checking Mode:** An alarm will sound if the counting result is not equal to the checking quantity number.

## Self-diagnostic test

With a series of 9 self-diagnostic tests, the operator can test all major components of the machine to ensure proper functioning and making trouble-shooting easy.
