

Secure, Controlled & Reliable Payout Solution for Video Gaming Operations

SAFE CASH

SafeCash™ was designed by United Coin, a route operator with 50+ years of experience and 20 years using their safe systems on their routes.

A proven & tested solution for bar video gaming operations in Illinois video gaming market...with more than 800 SafeCash™ systems in operation in Illinois.

Operator Peace of Mind

SafeCash™ is an advanced cash management system that secures your video gaming cash and provides a controlled framework for managing gaming payment transactions and reporting. With the back-office system locally managed and the cash drawer separate from your primary operation, balancing your gaming financials is easier, more accurate, and most importantly more secure. Controlled access to the cash also means 100% accountability.

Reduces Risk & Superior Service

SafeCash™ will only dispense cash when processing a valid gaming machine ticket. Clerks and managers do not have keys to the safe, and cannot manually override to gain access. SafeCash™ is supported by Suzo-Happ's superior field service and sales team that have gaming experience.

Fast Transaction Processing

Once a valid voucher is scanned, SafeCash™ systems quickly and accurately dispenses, in one transaction, all notes (down to the exact dollar) from the safe and then only coins will be stored and paid out from the integrated cash register drawer.

Increased Customer Interaction

Allows for personal interaction with customers to aid in the incremental sales of food & beverage while providing for proper age verification and retention of redeemed tickets. Bartenders will be engaged to promote play, oversee machines and even the possibility to earn tips.

Increased Food & Beverage Revenues, Age Verification, User Friendly Software and On-Line Visibility to Cash

Operator Benefits

- Cash is secured in heavy-duty 11 guage double-lock safe with 3 point locking system
- Automated cash dispensing eliminates employee errors on payout
- Improves customer satisfaction
- Small footprint minimizes space for installation

Clean User Interface

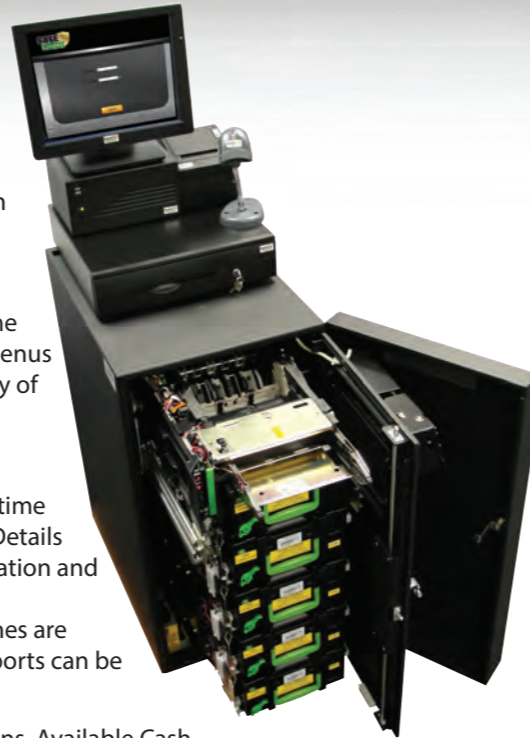

- Use of the barcode scanner or touch screen is designed to reduce touches-to-transaction time and allow users to navigate with ease to the menus they need, saving time and improving accuracy of work.

Track Your Money

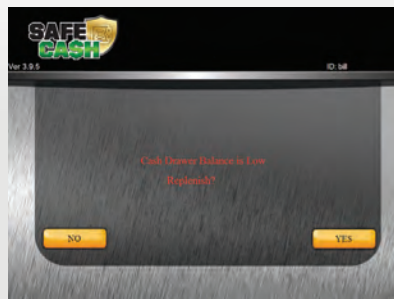

On-line access thru the Operator Portal to a real-time SafeCash details for proper cash management. Details include cash balance report broken down by location and alerts to remaining percentage of cash on-hand.

No additional fees or special communication lines are required to access this detailed information. Reports can be printed or exported out for further analysis.

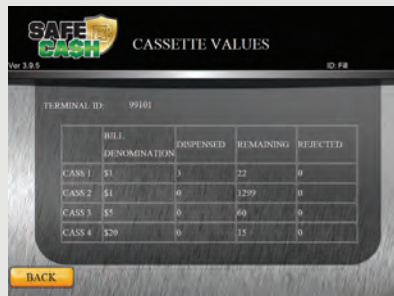

Detailed local reports to view detailed transactions, Available Cash, Fills, Dispensed and Coin Drawer Replenishment Cash, Rejected Bill Counts, and fill history provides complete transactional information with date and timestamp to the second. Reports can be run from and to a specific date range within 90 day period and printed to the 4" thermal printer.
