PSA-66-VST

SII
Seiko Instruments Inc.

The Industry's First Vertical Format Cashless Ticket Printer for Handling Tight Spaces

The new PSA-66-VST incorporates the proven technology of our highly successful PSA-66 ticket printer in a vertical-profile package that is ideal for gaming machines with space configurations that cannot accommodate standard horizontal type printers. It eliminates the need for gaming machine manufacturers to disassemble and reassemble a standard size printer – thereby saving time, expense and inconvenience while reducing time to market. It comes equipped with a ticket tray that holds up to 400 tickets in standard U.S. currency size. And the fanfold, perforated ticket stock can be pre-printed in full color on the non-thermal side. The PSA-66-VST offers an exceptional level of operational reliability and consistent print quality with high resolution of 8 dots/mm for numbers, bar codes, characters, and graphics such as logos and promotions.

- Shallow format design
- Proven PSA-66 technology
- Easy, drop-in paper loading
- 400 ticket capacity
- Two-year factory warranty
